

**Job Title:** Ethical Hacker

**Reporting to:** Head of Professional Services

### **The role**

The Scottish Business Resilience Centre are looking to recruit an Ethical Hacker based between our office in the Oracle Campus in Linlithgow, Abertay University in Dundee, and Remote Working at home. You will work closely with our Head of Professional Services and the wider SBRC team, including our team of Ethical Hacking students from Abertay University, to help manage and deliver the Centre's growing range of Professional Services, provide cyber security advice and cyber awareness training.

You will manage the day-to-day operations of our team of ethical hacking students, dedicated to identifying and reporting vulnerabilities within client systems and recommending remediation in a confidential and timely manner. You will also work closely with our Head of Professional Services to identify potential partnership and commercial opportunities, as well as contributing to the research and development of new Professional Services.

### **About You**

Educated to degree level in cyber security or a related field, you will be passionate about all aspects of cyber security and helping businesses to become more prepared and resilient to the ever-present risk of cyberattacks.

A cyber security specialist with a practical approach, you will be highly skilled in web application vulnerability testing, network infrastructure, as well as having a deep understanding of cybercrime and the current cyber risk landscape. We are looking for a self-motivated, organised and professional individual, with exceptional project management experience and proven track record of consistently delivering excellent results.

A confident presenter and team leader, with the ability to engage with stakeholders at all levels, you will be dedicated to continually developing your professional skills and knowledge of technical competencies, as well as maintaining professional qualifications to demonstrate competency.

### **Responsibilities**

- To manage the day-to-day and coordinate our team of ethical hackers to deliver our range of Professional services offered to businesses, including testing, cyber readiness presentations and social engineering inputs
- Work with the Head of Professional Services to manage and develop the Centre's cyber awareness training modules and range of Professional Services
- Deliver cyber awareness presentations at events, conferences and to SBRC members
- To assist on various SBRC projects, such as Exercise in a Box, Incident Response and Threat Intelligence, and any other projects that may require assistance.
- Support the delivery of the Centre's Professional Services to businesses within and out-with Scotland
- Report writing and presentation of findings and recommendations
- Schedule, arrange and prepare agendas, papers and presentations for SBRC Board, finance and senior management meetings where appropriate

- Assist with the interviewing and onboarding of new ethical hacking students
- Work with the Head of Professional Services to provide cyber training and support to SBRC members
- Attend any relevant meetings, events and networking opportunities within and out-with Scotland
- Work with the Centre's marketing team to regularly update the website and social media accounts with advice, features articles, blogs and videos
- Continual development of technical competencies and maintenance of professional qualifications
- Undertake any other relevant tasks as required by the Head of Professional Services
- Occasional evening and weekend work, and travel out-with Scotland

If successful, you will be required to complete and pass a Basic Disclosure check carried out by SBRC and its agent. You will also need to provide proof of right to work in the UK in advance of the start of employment.
